Here are nifty stories my fine fellow or sister-babe as the case may be! It's story-telling time for grown-ups, and YOU - Yes, YOU, my friend - are getting 1st crack at the darndest bunch of yarns and loads of cheer that you've ever seen in one book, but will see in: "GRANDPA HENRY

SPILLS THE BEANS" For example, there's a naughty story by Mark Twain. There's one about giant ants and another about giant Chinese boats. Open to any page and you'll find another nifty story to entertain you, surprise you and maybe change your whole life in a way Grandpa Henry's life changed to his great surprise (as he will tell you if you read his newest book, named above). There are a lot of pluses about that book, because it has dozens and dozens and dozens of stories that you will find mighty interesting, and some are pretty funny. Another plus is that it is cheap -- only \$9.87, and all you have to do is click on this green button to download the whole kit and caboodle into your home or office. You won't regret it. Nosireebob.
